

Study number: SB2640-CLIN-007

Now enrolling: The FASCINATE-2 study for adults with nonalcoholic steatohepatitis (NASH)

Currently there are no approved medications used to treat NASH, a disease caused by buildup of fat in the liver.

The FASCINATE-2 study is now enrolling adults with NASH to test the effectiveness of a new investigational drug. Study-related care will be provided at no cost, and health insurance is not required.

Ask your doctor if you are eligible for this study or call the study site: XXX-XXX-XXXX.
